

Contract for Undergraduate Research Projects in Biology

- 1) Guidelines regarding Undergraduate Research in Biology are specified in the current Catalog for students receiving academic course credit (see Biol 498). Students and the supervising instructor should fill out the form “**Request for Undergraduate Research Course**” and file it with the Registrar’s Office, as well as the form below.
- 2) In addition, the Faculty Research Advisor, with primary responsibility for supervising the research project, will select and chair the Senior Research Supervisory Committee (SRSC). The SRSC will consist of the Chair and two or three additional faculty as required, who will oversee the research project.
- 3) The Chair of the SRSC, in consultation with the committee members, will establish a grade for the student.
- 4) At least one public presentation by the student for the complete project is expected (typically at the end of a semester) and should be noted among the methods of evaluation.

Student Name: _____ ID number: _____

Project Title: _____
